Golden Ticket
ROADMAP

Golden Ticket

I created this project as a gateway to future endeavors. I believe that creating something simple but meaningful for others can be a wonderful experience. This project includes 9850 non-fungible tokens (NFTs) which serve as tickets to 3 different random numbers on each ticket. These tickets are referred to as "Golden" because they grant VIP access to additional information and perks. When one of these tickets is minted, the holder will have access to these exclusive benefits.

LAUNCH

The Golden Ticket Project utilizes the Ethereum network and has implemented a system where each wallet can only mint one non-fungible token (NFT). This was done to ensure fairness and equal opportunity for all participants. The sale will end when all NFTs have been sold. For the latest updates and information, please visit the Golden Ticket Roadmap page or the Golden Ticket page on OpenSea.

Golden Ticket VIP

If you minted an NFT for this project, you will receive two months of support to help you create NFTs related to the project. We will provide information on how to contact us for support once the minting process is complete. You can ask us questions about the contract and any other aspect of the project.

As a minted NFT holder, you will also have access to a full video documenting the creation of this project from start to finish. In addition, you will be given early access to join the whitelist for future projects and secure your spot. Finally, you will have the opportunity to participate in live Q&A sessions with the project creator, Where you can ask questions about the project (dates will be announced at a later time).

Golden Ticket Community

"As the creator of this project, I believe that the community plays a vital role in the blockchain ecosystem. My goal is for our community to expand and have a deeper understanding of how we can make the blockchain world more acceptable, trustworthy, and useful for the world. By learning together, we can work towards fixing existing problems and achieving the goals we have set for the future, ultimately leading to a better world for all."
